Summary of Ethical Analysis: SECHILIENNE SIDEC*

On the basis of the data provided, it seems clear that the group S chilienne-Sidec has adopted a genuine Sustainable Development approach. Nevertheless this in itself is not sufficient for us at the moment to say that the Group can be considered proactive in the matter. In fact, this approach covers only the issues SRC*(2) identified by the Group within the framework of its process of risk management. This means that the environmental issues and those linked to Product Responsibility are relatively well controlled. However, the other SRC issues require greater attention if the company wishes to be registered as a 'Responsible Leader' in its sector.

*(2) socially responsible companies

Scores
